

# Instructions for No-Sew Vest Pattern:

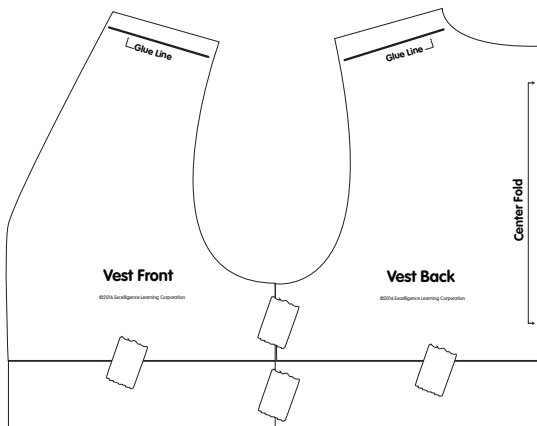

1. Print out the PDF file of VEST FRONT and VEST BACK on 8 1/2" x 11" paper, and then cut out the shapes.

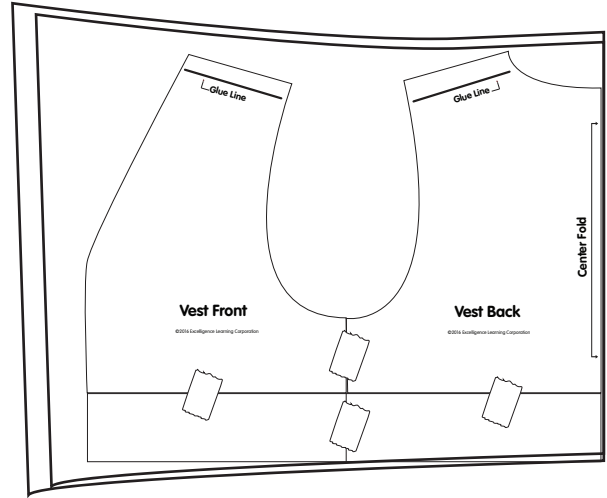

2. Tape a blank piece of paper to the bottom edge of each pattern, measuring from the bottom of pattern; add 6 inches to the length of each piece.

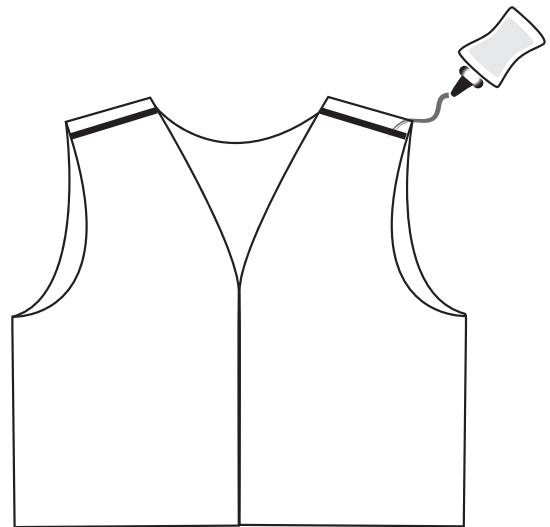

3. Tape the lengthened VEST FRONT and lengthened VEST BACK patterns together under the armhole to make one large pattern piece.

4. Trace the completed pattern onto a folded piece of non-woven fabric, with the back center piece aligned to the fold.

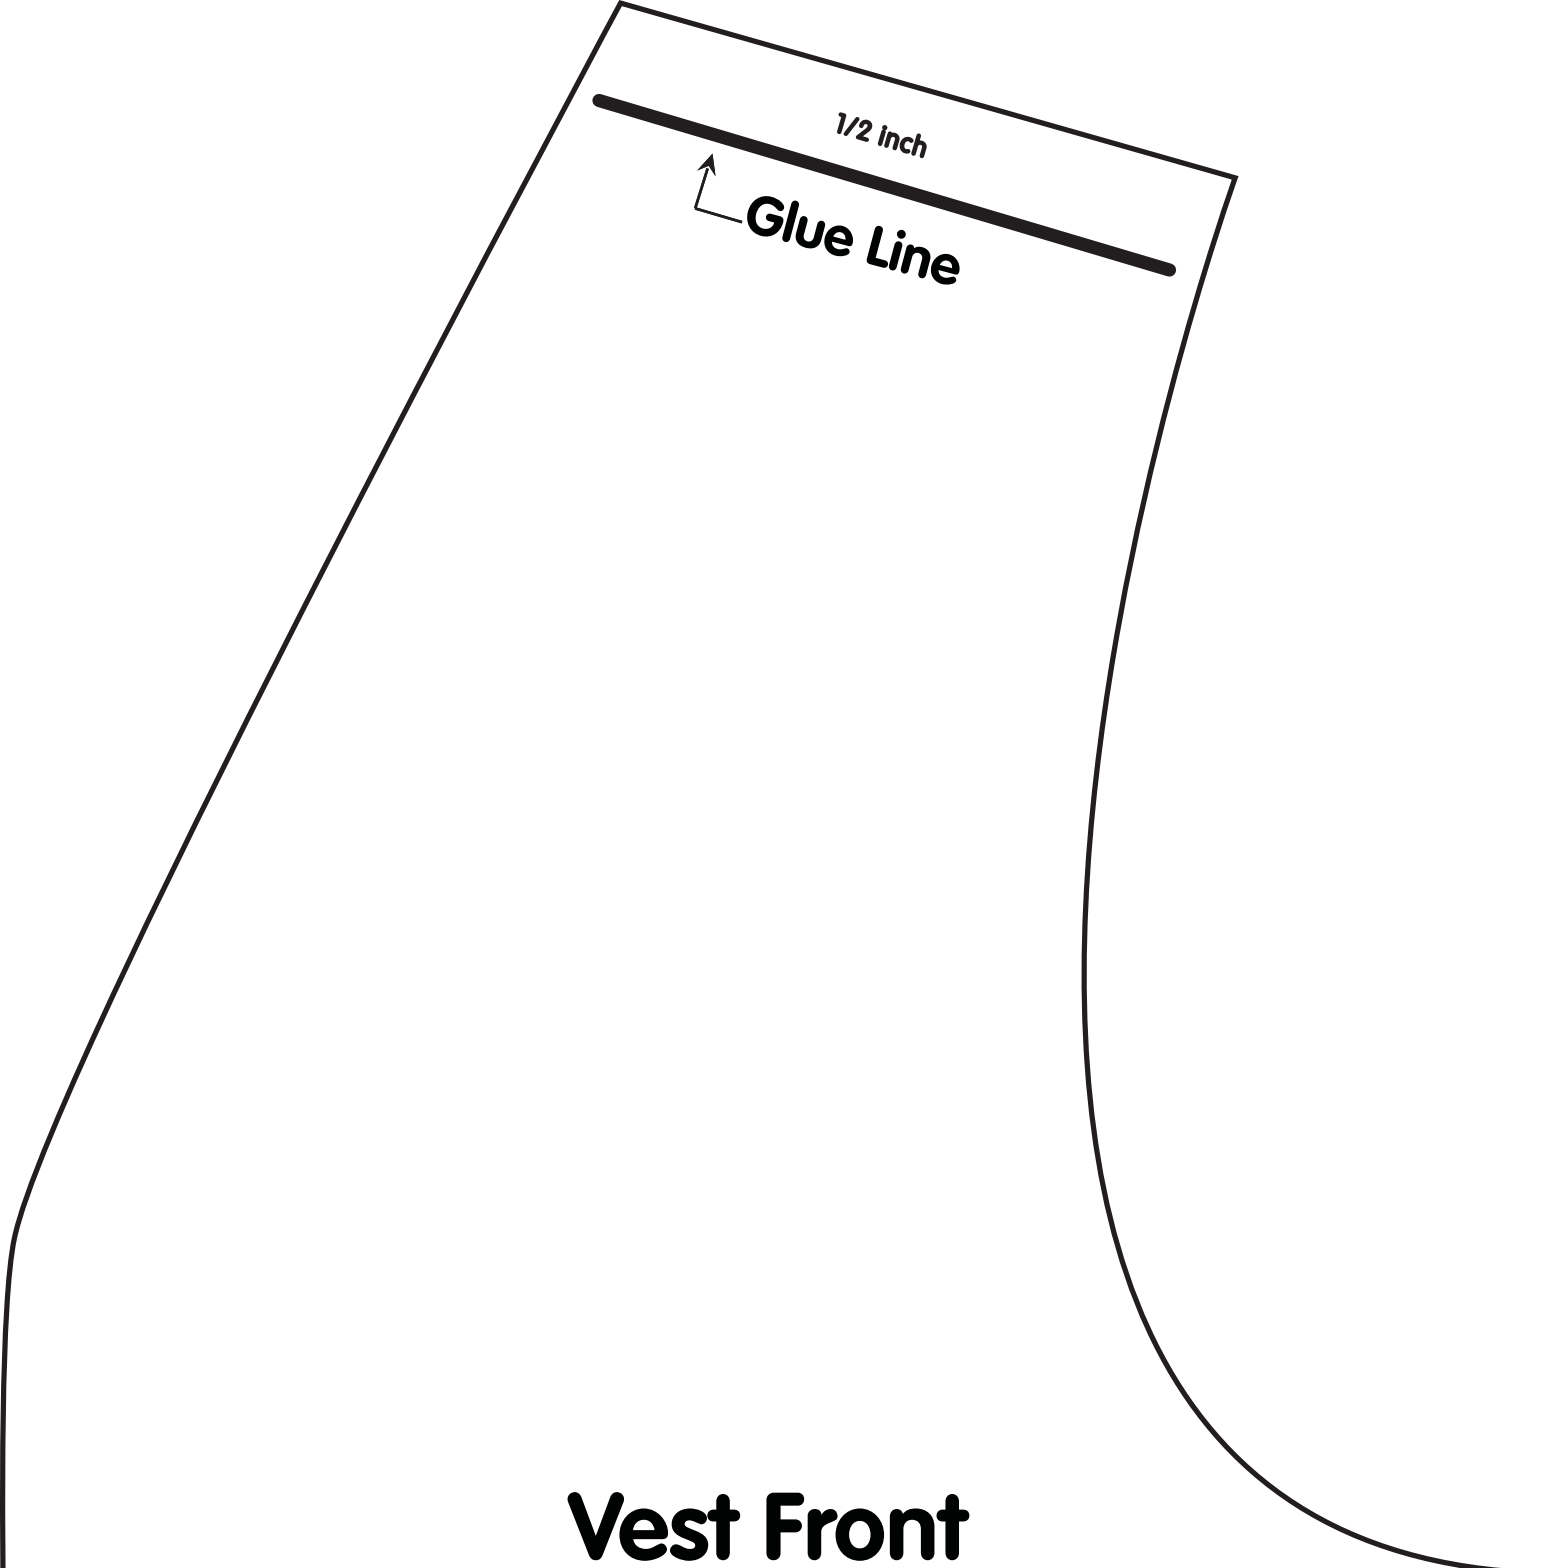

5. Cut out the vest shape through both layers of fabric and join shoulder seams together 1/2" from shoulder's edge with a line of liquid glue. Wait for the glue to dry and decorate with your favorite art materials. For best results, lay a piece of paper between the layers of fabric to keep glue from getting messy, and do not use hot glue.
